# INNOVATIVE ENGINEERING FOR CHALLENGING APPLICATIONS

---

Denatec provide expertise in the design, manufacture, installation & maintenance of Equipment used in extreme and challenging applications.

Quality is at the heart of what we do. Driven by a passion for engineering and drawing on over 50 years worth of experience, Denatec strive to deliver the highest quality products and services it can. Engrained within our ethos are our customers, as we strive to achieve excellence and take pride in building sustainable working relationships.

Inspired by innovation, Denatec aims to provide effective engineering solutions to overcome the challenges imposed by the world around us.

# OUR PRODUCTS

---

Denatec design, manufacture and install systems for challenging applications where extreme pressures, temperatures, loads and other risks are present. Equipment is designed and manufactured with safety and reliability in mind, whether it is a simple high-pressure assembly or a large scale, fully automated system.

All equipment is subject to a comprehensive Factory Acceptance Test before being delivered to the customer. Denatec will then carry out the positioning, siting & installation of the equipment before completing a rigorous Site Acceptance Test. (SAT).

Upon successful customer sign off, Denatec carry out formal training in the correct and safe operation of the equipment, issuing the final technical documentation and certification upon completion. Written Schemes of Examination can also be provided if required.

## Subsea Equipment Testing Systems

## Pressure Control & Fluid Management

## High-Pressure Equipment, Vessels & Autoclaves

## Automation Control

## Pump, Valve, Hose & Actuator Test Benches

## Machine Safety & Product Handling

# OUR SERVICES

---

Denatec offers a vast range of Project Management and Multi-Disciplined Design & Engineering Resource, coupled with specialist Installation & Maintenance Services which allow us to deliver projects through all stages of their life cycle.

Denatec serves a wide range of market sectors and this diversity allows creative cross-fertilisation of ideas & best practice, and their application from one sector to another.

## Design & Development

## Project Management

## Manufacturing & Assembly

## Installation & Commissioning

## Maintenance, Inspection and Upgrades

## Testing and Certification

## Spares

## Training
