

# MACHINE SAFETY AND PRODUCT HANDLING

For the minimisation of risk imposed with challenging applications to both equipment and operator

Denatec supply systems that allow for the effective and safe operation of equipment and personnel without hindering the application and/or process.

- ✦ Machinery Guarding & Enclosures
- ✦ Working platforms and walkways
- ✦ Stairs, access ladders and guard-rails
- ✦ Safety interlocking & exclusion zones
- ✦ Integrated manufacturing & safety systems
- ✦ Heavy Lift Systems for safe product handling

The design and specification of any safety system begins with a thorough survey of the equipment, machines or processes along with a review of the associated hazards.

Systems are designed and analysed using the latest CAD technology and ensure compliance with the Machinery Directive, PUWER and other associated Legislations

Each element of the safety system is manufactured and then assembled in Denatec's facility before being finally installed on site by their experienced engineers.

- ◆ Full safety enclosure, with interlocking doors, gantry crane, platform & access steps.
- ◆ Access platform with mobile steps, allowing access to the top of a large pressure vessel.
- ◆ Remote operation inclusive with CCTV & live data monitoring
- ◆ Product storage & handling tooling
- ◆ Lifting beams, gantry & lift systems

All equipment is subject to a comprehensive Factory Acceptance Test before being delivered to the customer.

All equipment is subject to a comprehensive Factory Acceptance Test before being delivered to the customer. Denatec carry out the positioning, siting and installation of the equipment before completing a rigorous Site Acceptance Test. (SAT).

Upon successful customer sign off, Denatec carry out formal training in the correct and safe operation of the equipment, issuing the final technical documentation and certification upon completion. Written Schemes of Examination can also be provided if required.
